STILL REACHABLE | CONNECTIVITY WORKSHEET

New-number confirmation sheet

A local record for a new US mobile number. Do not write an SSN, IMEI or account PIN on this sheet.

Fictional teaching example

Number task	New US number, not a port	Reader decision
Home-country number	Keep the home line separately	Reader decision
Account type	Verizon Prepaid	Choose postpaid or prepaid
Plan and price record	15 GB, $35/month with AutoPay after a $45 first month	Published price, before taxes and fees
AutoPay	Will use AutoPay	Condition, not a default
Device model and sales market	Fictional model X, sold in India	Exact model and market, never an IMEI
Carrier lock	Unverified	Ask the old carrier
SIM or eSIM	eSIM plus physical SIM slot	Model specification
Official compatibility check	Not run in this fictional example	Verizon's checker only
Student discount	Eligible status unverified	ID.me verification and 12-month recheck
Offer conditions open	Switch discount duration, student stacking	Do not assume a stack
Questions still open	Document accepted at the chosen channel; device compatibility	Ask the carrier

The plan fields use Verizon's published 15 GB price read on 2026-10-26; the device, lock and reader details are invented. It is not a quote or an approval.
